

Project Engineer

Seymour Engineering is seeking a Project Engineer to join our Team to continue the tradition of providing reputable service to our clients.

We are a well established locally owned design firm founded in 2005.

Responsibilities in this position will include:

- Different design components include drainage, water and sewer, roadway, and marine projects
- Assignments will also involve tasks associated with producing a set of construction documents including drafting, quantity computations, specifications, and cost estimates
- Identify Geotechnical Investigation needs for project support and to evaluate Geotechnical Reports to support project recommendations and designs
- Construction administration duties will also be performed

Requirements

- Bachelor's degree in civil engineering from an ABET accredited program
- Registered Professional Engineer
- 4-15 years of related experience
- Must have previous experience in civil engineering design
- Strong communication skills
- Strong working knowledge of MS Office

Preferred Skills

- Previous experience in consulting engineering with a primary focus on working with local municipalities, counties, and state agencies
- Familiarity with AutoCad
- Experience in water, sewer and stormwater modeling to conduct analyses to identify infrastructure deficiencies and develop project design options

We offer competitive salaries, health benefits, retirement plan, vision/dental, and an excellent work environment.

Interested candidates should send their resume to mark@seymourenge.com. No phone calls please.
