TOWN CENTER DEVELOPMENT

Scope of Work: This project consists of the design of a three-phase design concept, surveying, and ultimate construction, of the City of Gautier's Town Center Development. The engineering duties consisted of the design of various roadways, sidewalks, parking lots, and earth moving as needed to develop the Town Center property. The scope also consisted of the design of all drainage, and water and sewer utilities. Furthermore, Seymour Engineering was required to design various amenities such as an amphitheater, pickleball courts, concessions stands, basketball courts, a football field, pavilion, and fire pits. SE is responsible for construction management of this project also.

Project Team: Mark Seymour, Jr.-Principal Engineer, Matt Holt-Resident Project Representative, SE Survey Crew
