

## Bayview Avenue Bulkhead and Boardwalk

### PROJECT DESCRIPTION

Project consisted of the construction of a new concrete boardwalk supported by vertical steel and vinyl bulkhead. Approximately 1800 LF of concrete ADA compliant boardwalk of varying widths was constructed along the north side of Bayview Ave. to provide a safe viable walkway expanding public pedestrian access. The boardwalk provides designated pedestrian crosswalks, and includes lighting, an open-air shade covered pavilion, benches, trash receptacles, and educational signage depicting cultural and natural environmental resources of the area. In addition to public access, this project will also aid in coastal restoration and conservation of adjoining wetlands.

The walkway stretches from Forrest Avenue to Kensington Drive offering a third of a mile for pedestrians to stroll or run on.
